Customer Problem Statement

I am	Customer and their attributes	A Service Desk agent who receives and manages IT incidents reported by end users through ServiceNow.
I'm trying to	What the customer is trying to achieve	Create, classify, assign, investigate, and resolve incidents quickly through a structured and transparent process.
but	Problems or barriers	Incidents may involve incorrect classification, delayed escalation, repeated troubleshooting, and limited visibility of related records or SLA status.
because	Root cause of the problems	Incident handling requires coordination between Service Desk agents, Level 2 support teams, Change Management, and other stakeholders.
which makes me feel	Emotions caused by the problems	Frustrated and uncertain when incidents are delayed, ownership is unclear, or resolution and SLA progress are difficult to track.

Combined Customer Problem Statement

I am a Service Desk agent who manages IT incidents for end users. I'm trying to create, classify, assign, investigate, and resolve incidents quickly through ServiceNow, but the process can involve incorrect classification, delayed escalation, and limited visibility of related records because multiple support teams and activities are involved, which makes me feel frustrated and uncertain about incident ownership, resolution progress, and SLA status.
